

Herbicides containing acetochlor or atrazine

Know your product's chemistry! Acetochlor and atrazine are being found in Minnesota's surface water and groundwater. In some vulnerable areas, there are risks of these chemicals exceeding health or environmental standards.

It is important that pesticide applicators know which herbicide products contain these active ingredients. Protect water quality by following the product label and adopting the Minnesota Department of Agriculture's voluntary water quality best management practices for acetochlor and atrazine. Information on these practices is available at www.mda.state.mn.us/herbicidebmps or by telephoning the MDA Pesticide Management Unit at 651-201-6141.

Acetochlor products registered for use in Minnesota – 2010

(Acetochlor either by itself or in combination with other products)

Breakfree	Degree	Keystone *	Tremor
Breakfree ATZ *	Degree Xtra *	Keystone LA *	Tremor AT Lite *
