#### **SUCCULENT LIMA BEANS**

---

Refer to Region 4 and Region 5 Maps on Reflex Section 3 Federal label.

**Use areas in Region 4 in Minnesota:** All areas south of Interstate 94.

**Use areas in Region 5 in Minnesota:** All areas south of U.S. Highway 2 (except those areas in Region 4), plus Betrami, Clearwater, Lake of the Woods, Kittson, Marshall, Pennington, Polk, Red Lake, Roseau.

#### **Postemergence Application**

Apply Reflex Herbicide at 0.75 - 1 pint/A as a postemergence broadcast application in lima beans. Refer to the federal label for weeds controlled or partially controlled by postemergence applications. Apply when broadleaf weeds are at the 2-4 leaf stage. Apply when lima beans have at least one fully expanded trifoliolate leaf. Some bronzing, crinkling or spotting of leaves may occur following postemergence application, but lima beans soon outgrow these effects and develop normally.

#### **Spray Additives**

Only spray additives cleared for use on growing crops under 40 CFR 180.1001 may be used in spray mixture.

For postemergence applications always add one of the following:

Nonionic Surfactant (NIS) - Use NIS containing at least 75% surface active agent at 0.25-0.5% v/v (1-2 qt/100 gallons) of the finished spray volume.

Crop Oil Concentrate (COC) - Use a nonphytotoxic COC containing 15-20% approved emulsifier, at 0.5-1% v/v (0.5-1 gallon/100 gallons) of the finished spray volume. COC can improve weed control but may slightly reduce crop tolerance.

Do not use UAN (28% or similar) or ammonium sulfate mixtures on lima beans as severe crop injury may occur.

### **Sequential Applications with Other Products Registered for Use in Succulent Lima Beans**

Reflex Herbicide may be applied sequentially with other pesticide products registered for use in lima beans. Always follow the directions for use, observe the stated precautions, and abide by the limitations and restrictions for all products. The most restrictive labeling of any product used applies.

### **Use Restrictions**

- Do not exceed 1 pint of Reflex Herbicide per acre in any one year.
- Do not apply to any field more than once every two years.
- Do not graze treated areas or harvest for forage or hay. Do not utilize hay or straw for animal feed or bedding.
- Do not apply within 30 days of harvest.
- Refer to Reflex Herbicide Section 3 federal label for rotational crop restrictions.
- Do not tank mix other pesticides with Reflex Herbicide as injury to lima beans may occur.
