

Pesticide Label Revision Checklist

Textual content changes to pesticide labels must be reviewed by the MDA to ensure the changes won't affect product registration status. Only one revised label is needed when various package sizes are sold if the labels are otherwise identical. Changes in label colors or graphics don't require submission for review. Revisions that include a change in the product name or EPA number require a new registration. Complete the table below for each updated label. MDA will contact registrants if we have questions or concerns with the revisions.

NOTE: "Pollinator Lethal" is any product with a pollinator box or any pollinator, bee, or honeybee precautionary statements in the label's environmental hazards section (MN 18B.09).

Submit using only one of the following methods:

1. Email this completed checklist to Pesticide.Registration.MDA@state.mn.us and submit revised labels & SDSs through ALSTAR application.
2. Email revised labels & SDSs along with this completed checklist to: Pesticide.Registration.MDA@state.mn.us

NOTE: All labels and SDSs must be submitted in text-searchable PDF format. Submit multiple forms if more space is required.

Line #	Name of product	EPA reg. #	Minnesota lic. # corresponding to this product	New crop use(s) added?	Agricultural use requirements box added or removed?	Restricted use pesticide (RUP) box added or removed?	Pollinator Lethal language added or removed?	Method used to submit label & SDS
