

## **Power Outage Checklist**

## **Disposal and Monitoring**

Disposal and Monitoring
The facility must dispose of the following, as applicable:
<ul> <li>□ Foods being cooked when the power went out. Note that during brief power outages (&lt;1 hour) foods being cooked may be re-cooked to 165°F when power returns.</li> <li>□ Perishable, potentially-hazardous/ TCS food in the "danger zone" (41°F – 135°F) for more than 4 hours.</li> </ul>
The facility should be monitoring and recording temperatures during the power outage. Identify the method and frequency of monitoring.
Strategies to Maintain Cold-Holding
The facility may employ the following strategies to maintain cold-holding during a power outage, as applicable:
<ul> <li>□ Keep refrigerator and freezer doors closed</li> <li>□ Avoid adding hot food to refrigerator or freezer units</li> <li>□ Cover freezers or coolers with tarps or blankets</li> <li>□ Add dry ice to refrigerators or coolers</li> <li>□ Rent a refrigerated trailer</li> <li>□ Store cold items outdoors if outdoor temperatures are below 41°F and products can be covered and protected from sources of contamination</li> </ul>
Cleaning and Sanitizing
The facility must clean the following, as applicable:
☐ Spills, leaks, or melting in refrigerators and freezers
Additional Impacts
<ul> <li>□ Verify that circuit breakers have been reset</li> <li>□ Verify required equipment/utilities are in working order (refrigerators, freezers)</li> <li>□ Verify hot water can reach adequate temperature for hand- and ware-washing (&gt;100°F)</li> <li>□ Verify the facility is safe for food production or storage</li> </ul>
Remember: When in doubt, throw it out.
